OGR GWM | 132 JUBILEE HIGHWAY WEST, MOUNT GAMBIER, SA 5290 | PHONE 08 8724 1177

The Haval H6GT is fast becoming a common sight on Limestone Coast roads, with plenty of locals jumping on board thanks to its hybrid engine and standout features.

Its impressive fuel economy is catching people's attention, cementing the H6GT as one of the top choices in its class.

OGR has done a stellar job showcasing what the H6GT can do, and the community is clearly responding.

As more residents look to make the switch to hybrid motoring, this sleek model is proving to be a favourite among new adopters.

This week, three locals - **BIANCA**, **MARK** and **RORY** - who have recently purchased the Haval H6GT gave their honest opinions on the car's performance, features and buying experience.

BIANCA

WHAT HAVE BEEN YOUR INITIAL THOUGHTS AFTER OWNING THE HVAL H6GT ?

"Initially I was pretty impressed with it considering it's a Chinese car but to be honest it's been really good."

"I'll be honest, I initially had my sights set on another plug-in hybrid for the past two years, but my husband suggested that I should take a look at the Haval H6GT after doing a whole lot of research on them.

"I am so glad that I did look into it as an option and had a test drive as it is seriously one cool car.

"The actual car itself is beautiful, I love a sporty looking car and I'm obsessed with the crayon grey colour. It seems to have a billion cameras on it which is very helpful for parking, and it is especially speedy."

"It's been really good to drive and it's very economical because we have been mainly driving it on the electric battery which we have not had any problems with."

WHAT MADE YOU DECIDE ON PURCHASING THE HVAL H6GT ?

"I looked at other (manufacturers in the region) and stuff like that but none of them had what the Haval had, and price wise it was pretty competitive for a 4WD."

"The main thing which pushed us was the 100km fuel range which is pretty impressive."

RORY

FUEL ECONOMY IS A BIG TALKING POINT, WHAT HAS YOUR EXPERIENCE BEEN ?

"Very impressed. For instance, I filled my car up last in Strathalbyn a fortnight ago and it is still sitting at over three quarters of a tank."

"As I work predominantly from home, I can make the most of charging through the solar during the day.

During the week when I am a mum-taxi, the car is just in EV mode.

"We are also on a night saver EV charging plan with our electricity so that works well for us. I have hardly been to the fuel station since having this car."

"We liked it because we have got a good solar system at home, and we thought it would be a good power dump during the day while the power goes negative with solar."

"It's been really good to drive around with and we have done a few longer trips with it, we have got a good 150km out of the battery before the engine kicked in to keep the battery topped up to a certain level."

"We have still got the original tank of fuel we got it with, so it's been very economical."

CREATURE COMFORTS ARE IMPORTANT - WHAT HAS IMPRESSED YOU ?

"It's just really easy to drive, everything about it is easy and doing the electric driving we barely use any fuel so that side of it has been really good."

"The way the motor can just seamlessly cut in and out with the battery and engine, you do not even notice it."

"It's got really good pick up of acceleration and it's got good performance around town."

"It's got all the latest gadgets which are cool and

you can turn some of them off if you want like the lane control, being on country roads sometimes it gets tricky with things like potholes on those roads."

"It's also got a 3D view for when you're parking and it also has a reverse track, so when you drive down a winding driveway it can reverse out for you, so it's got some interesting stuff on it that's for sure."

Things like heated and cool seats which are nice and the 4WD sticks to the road pretty well."

HOW WAS YOUR BUYING EXPERIENCE WITH THE OGR GWM TEAM ?

"The buying experience was really good, we had a test drive and we had a good chat about it and we decided to go with the plug-in hybrid."

"This was the first time that I have purchased a brand new car - even ordering it in the colour I wanted felt so luxurious."

"The OGR team were great to deal with and kept me updated with the progress. I appreciated their honesty as this was a new car to the country so we were learning the technology together."

"I have recently had my 10k service."

"Things are going great and I am thankful for purchasing local and having an actual person to contact if needed."

WHAT DID WE THINK?

What was already a top-notch SUV packed full of features and tech in the GWM Haval H6 has just gotten even better!

Popping down to Mount Gambier's OGR GWM and checking out the popular line-up of vehicles landed us in the hot seat of the 2025 Haval H6 Ultra PHEV - A 1.5-litre turbocharged plug-in hybrid SUV with all the fruit and an all-new infotainment system, which absolutely knocks your expectations out of the park - but more on that shortly!

In the belly of the beast, the PHEV unit puts out a combined 268kW of power and 76Nm of torque from its front and rear electric motors and turbo petrol engine, while its on-road performance gets you

from 0-100kph in just 4.8 seconds, meaning getting up to highway speed or navigating overtaking lanes will be a breeze.

Not bad from a family SUV!

On the outside there are a couple of significant changes to our last H6 experience, with an all new front and rear end design sporting sleek LED headlights and 'teardrop' style daytime running lights, while out back the full-width LED tail lamps have been separated, with GWM badging taking pride of place in the middle of the tailgate, which also receives the electric treatment.

A host of matte-black accents complement the Ayers Grey paintwork - which looks absolutely outstanding under the sun - while gloss black 19-inch alloy

wheels are framed nicely by the Haval H6 side profile.

In the way of other colour options GWM has also made Hamilton White, Golden Black and Astral Pearl available for those who want to mix it up a little.

Hopping inside is where the real treat is delivered, with the all-new Coffee AI infotainment system enhancing the user experience immensely.

It is not the previous infotainment setup was bad in any way at all - this new system just surpasses that and puts the power in users' hands to customise their drive to suit their own preferences and demands.

The 14.6-inch infotainment system is a high definition display that does it all.

Everything from satellite navigation to controlling your heated and ventilated seats, climate control system, driving aids, audio system and more is right there where you need it, while the vehicle settings are

prepared in an easy to navigate layout to take the headache out of tweaking the tonne of individual settings to get the H6 SUV just how you like it.

The Coffee AI system also allows users to download apps to the unit to further enhance their Haval H6 experience, while voice commands enable the ability to talk to the system should you wish to set navigation routes, open windows or the large panoramic sunroof overhead or adjust audio controls and make calls.

Pair this with the premium DTS sound system to pop you in the front row of all your favourite artists concerts through radio or Bluetooth audio with Apple CarPlay and Android Auto and you have got everything you could ever wish for and more.

A nifty read out to show you how the system is sharing the load between electric and petrol power is also intriguing to see how you're faring on longer journeys, with

figures pushing the 1000km mark between the two energy sources.

The thought of being able to drive from Mount Gambier to the big smoke and home again and only needing to top up a smidge to

A nifty read out to show you how the system is sharing the load between electric and petrol power is also intriguing to see how you're faring on longer journeys, with figures pushing the 1000km mark between the two energy sources. The thought of being able to drive from Mount Gambier to the big smoke and home again and only needing to top up a smidge to make sure you get home is pretty incredible.

make sure you get home is pretty incredible.

And this is before we even touch on the digital cluster, heads up display, high-quality electric adjustable seating, wireless phone charging, host of USB ports, large rear cargo

space and suite of driver aids.

The way the SUV tackles the city streets and open road is equally as impressive as how it looks and its incredible comfort level, with light but direct steering, punchy

performance and a solid on-road presence making every drive a pleasant experience. Being able to dial in your steering, regenerative braking and performance also helps owners dial in their optimum

driving settings.

Safety is a paramount concern in the Haval H6 - with the SUV equipped with a suite of advanced safety features and undergoing rigorously testing to receive a 5-Star ANCAP rating.

The vehicle's sturdy construction, along with features such as multiple airbags, advanced braking systems, and driver-assist technologies, ensure a safe journey for you and your passengers, while servicing is easier and more predictable with dealers providing capped price servicing for routine maintenance.

The Haval H6 Ultra PHEV also comes with a comprehensive 7-year unlimited kilometre warranty for the vehicle, with an impressive 8-year warranty specific to the hybrid battery unit, ensuring GWM's commitment to quality and customer satisfaction underscores the vehicle's reliability and durability.

With all these features packed in to the Haval H6 Ultra PHEV with a price point of just \$47,990 driveaway for two-wheel drive models and \$50,990 driveaway for all-wheel drive models (with an additional \$495 for premium paint finishes), it's easy to see why the vehicles are popping up all over the South East and Western Victoria.

Want to know what's just as impressive? Every GWM Haval H6 Hybrid or Plug-In Hybrid vehicle sold until the end of the year can be financed at just 1.99% over a maximum term of five years with no balloon payment, with all H6 PHEV purchases including a free at-home wall charger!

If this has got you wanting to hop into a brand-new vehicle packed with features at an impressive price point and enticing finance package, pop in and see the team at OGR GWM at 132-138 Jubilee Highway West, Mount Gambier or contact the dealership on 8724 1111 to find out more!
